

Northeastern Vermont — Rural Hospital

\$305 / hour

All-inclusive rate

Up to 6-Month Contract

Coverage needed through at least October

THE ROLE

- Independent CRNA model — no collaborative physician agreement required
- Non-call position, with the option to take call once trust is built with the team
- General surgery, OB/labor & delivery, ENT, orthopedics; anesthesia blocks and urgent consults for pain management (not full pain-clinic scope)
- Low pediatric volume — if any, they are mostly ENT cases (ear tubes, occasional appendectomy)
- Joining a tight-knit, well-respected anesthesia team

CREDENTIALING

- Electronic application — temporary privileging within 24 hours of a completed file
- DEA registration with a Vermont address required before first shift (can be expedited through the Boston DEA office)
- Current immunizations and titers required
- VT license required — no reciprocity; allow ~8 weeks (IMLC-compact holders typically move faster)

HOUSING & TRAVEL

- Hospital-provided, fully furnished 2-bedroom condo (Airbnb available too)
- Airfare and rental car included; if traveling once per month, airfare is negotiable above the all-inclusive rate
- Best airport options: Manchester, NH (~2 hrs) or Hartford, CT (~2.5 hrs); Boston also workable — a rental car is needed from any of them

THE FACILITY & AREA

- 25-bed Critical Access Hospital, serving the region since 1970
- Located in Vermont's Northeast Kingdom — minutes from the Canadian and New Hampshire borders
- Four-season outdoor access: skiing, mountain biking, hiking, and lake country
- A close-knit community setting with a surgical team that values continuity and fit

WHY AVEA CRNA

- Every candidate is personally screened by a practicing CRNA — for clinical fit and personality, not just a resume match
- Direct, single point of contact from first call through credentialing
